## Time Zones and Daylight Saving Time:

Baja California will be observing Pacific Daylight Time on our next clinic, scheduled for May 12. That makes them the same time as Arizona. So 10:00 on your watch is 10:00 in El Rosario or San Quintin. Remember, most cell phones are set to automatically show the local time.

Pilots need to remember the San Felipe Airport ALWAYS opens at 0800 Arizona time. San Felipe adjust their hours to make this happen.

**First Timers:**

		
Danitza Aguirre	Lisa Fogle	Michael Gardner
		
Haoting Pei	Kaylee Ratcliffe	Edgar Ventura

## DENTAL Snapshot

Our dentists for the weekend were Dr Michael Gardner and Dr Lisa Fogle. They did an amazing job and received special thanks and blessings from the patients they served.

Dr Mike tackled extractions and fillings without respite. Then Dr Gardner rounded out his days with 4 impressions. Jim Pyland prepped appliances for try-ins and they delivered 3 completed appliances to the patients from previous clinics.

Edgar Ventura who is fluent in Spanish was not only assisting the Dentists, he proved to be an excellent interpreter for both the Dental and Medical Clinics and pitched in wherever he was needed. His flawless command of both languages was duly noted by all.

Dr Gardner was fabulous and the patients were happy and thankful. They received a blessing from one patient and thanks from another

Jim Pyland, our Dental Tech managed to finish a flipper for one patient amongst the 3 denture appliances that were delivered to patients and the 3 appliances he prepped for delivery in May.

Dr Fogle focused on patients that presented for “cleanings” but quickly morphed into more complex cases including fillings, extractions and periodontal cleanings. She remained steadfast and helped many patients on our short visit. She deserves a round of applause for working in a new environment with Vince Lasamana, her dental assistant for the day. It was challenging but Lisa and Vince did a marvelous job.

A special shout out to Danitza Aquirre (in pink) who was our primary dental assistant working with both Dentists.

She helped orient Edgar Ventura and Kaylee Ratcliffe in the processes so they could jump in at a moments notice. They worked effortlessly and seamlessly as a team to help the Dentists attend the myriad of cases that we saw this weekend.

Kailee Ratcliffe has a broad skill set as an EMT. She helped to attend patients in both the Dental and Medical clinics, lending a hand with aplomb and a welcoming smile. She helped treat/diagnose medical patients as well as helping to prep patients in the dental clinic.

## **MEDICAL Snapshot**

Medical clinic had a steady stream of patients with Dr Bruce Stewart, NP Patti Daly and Haoting Pei attending to 20 patients this weekend. One patient had a toe injury that required Patti and Bruce to anesthetize the area before working to relieve the pressure. Antibiotics were given to the patient who was grateful for the relief.

The medical team, assisted by Jennifer Stewart, Kaylee Ratcliff and Edgar Ventura also fitted 14 patients with new glasses. There were many smiles to go around and many thanks for the much-needed glasses.

Among the patients with a myriad of complaints, Patti found time to give Haoting, Kaylee and

Edgar a detailed lesson for removing foreign debris from eyeballs. Using an ophthalmology Slit Lamp (microscope) Patti found the source of a sore spot on an eyeball caused by a small lesion. She then proceeded to explain how foreign objects should be removed. A fascinating look at a very common ailment for patients that work outside in windy conditions.

The ear irrigation set came in handy this weekend. A patient presented with a loss in hearing. It was so acute for him that he was concerned. Using the ear irrigation and wax softening drops, Dr Stewart removed a large plug in the patient's ear. That patient was so relieved and happy at the outcome that he was happy to have the other ear checked. All good.

## **OPERATIONS**

Carl Foster, Tim Burris, and Rod Callison not only flew our volunteers down and back, they also addressed issues with the water lines, the water pump and tidied up around the clinic.

When one of the vans had a flat, they tried to change the tire to no avail. They could not remove the lug nuts. They called a tire mechanic to get the tire replaced. The lug nuts were so hard to remove he had to use an impact wrench to remove them. The mechanic suggested that we might want to have all the tire lug nuts removed and lubricated when it is time to rotate them. A

great lesson to remember if we ever have a flat somewhere!

Sunday morning departures were delayed a few minutes by a rather light fog. By 8 am it had lifted enough and we started departures around 9 am. Arriving at San Felipe a few planes gassed up and things went smoothly for our departure.

Arriving at TIA we were greeted by a group of border protection trainees. New officers and new dog sniffed and inspected our planes and luggage before sending us on our way. We did learn that we cannot bring too many shells from the beaches.... Who knew?!... But good information to pass on to others on future trips. By Sunday afternoon, everyone was safely home.

### El Rosario Vehicle Status:

APRIL VEHICLE STATUS SUMMARY											
Vehicle	Service Date	Location	Mileage	Miles Driven	Fuel	Fuel Added		Miles/ Gal	Cost/ Gal	Status	Discrepancies
						Gal	Cost				
Chrysler	4/15/23	Robertson's Ranch Airstrip	126,003	95	Full	5.6	\$27.80	17.0	\$4.96	Operational	
Dodge	3/11/23	Robertson's Ranch Airstrip	98,024		Full					Operational
